

From our humble beginnings in 1970 as a family business, Magic Kitchens & Furniture has gained a growing reputation for quality, service and value for money.

Being a family business, we are always mindful of presenting value for money and spending that little extra time with all our customers to ensure we clearly understand their requirements. Our qualified staff will discuss plans and ideas with you to make sure you know what is available at Magic and in that way, we can tailor products and services to your needs.

It's this kind of customer relations over 40 years that is now seeing us serving second and third generations of the same family.

Having received many industry awards for design and quality over the years, we believe our performance speaks for itself. Magic's award winning kitchens are a result of many years of experience and a bold desire for innovation, tempered by extensive research and quality control.

Although most styles are catered for in our furniture, Magic specialises in sophisticated contemporary furniture based on thoughtfully proportioned geometric designs with clean lines that are timeless, functional and attractive.

Magic's has its own production plant which is located adjacent to our fully equipped display centre covering approximately 30,000 sq feet. This allows us to create kitchens and furniture to meet your needs.

Everything we do here at Magic Kitchens and Furniture is with the intention of creating a complete storyline where we can offer an exciting theme throughout the home, starting from the kitchen through to the furniture and culminating with the interior decorating. With our vast range of unusual art pieces decorating our displays, Magic really is a "one stop shop"
