

At Magic, we work hard with our Australian suppliers to come up with unique products and designs that offer great quality, innovation and flexibility. As well as offering mainstream pieces, being a “direct to public” manufacturer and having our own production plant on site, we can produce many custom made pieces to meet your needs and room requirements.

We are happy to sit with you and work off your house plan to come up with the best furnishing solutions to suit your needs. Browse through our extensive range of fabric and leather samples and allow our experienced staff to help colour co-ordinate your project. We can also work with you to develop and create new designs, often using exotic materials such as stainless steel, solid timbers, exotic veneers and re-constituted stone to bring your vision to reality.

We are proud to say that approximately 80% of our furniture is Australian designed and made and we have great pleasure hearing new customers comment on our unique look.

For a small fee we offer a full delivery and assembly service by our own staff and we will be happy to take away any unwanted wrapping if requested. Our friendly staff are looking forward to serving you when you visit next.
